EXPERIENCE

Deloitte's Technology Job Simulation-Software Engineering Intern [Link](#)

- Deloitte — Engineered a Python telemetry unification pipeline for Daikibo Industrials' IIoT infrastructure and authored a full-stack real-time manufacturing dashboard proposal covering system architecture, UI/UX wireframes, effort estimation, and delivery timeline.

PROJECTS

AI-Powered Performance Evaluation Tool [Link](#)

2026

- Final Year Project — An intelligent system that automates employee performance evaluation using NLP and machine learning. The tool analyzes qualitative feedback, quantitative KPIs, and behavioral patterns to generate unbiased, data-driven performance reports.

Tax Graph AI [Link](#)

2026

- Designed & Developed the frontend for Hackathon CUST 2026 competition's project, knowledge graph-based tax intelligence system 'Tax Graph AI' that analyzes citizen data from multiple sources to detect income-reporting anomalies. Built responsive dashboards, risk assessment interfaces, and audit trail visualizations for tax compliance monitoring.

Student Attendance and Result Portal [Link](#)

2025

- A student LMS web application for students and teachers to edit/view results and attendance. Built with a RESTful API backend and a responsive React frontend.

ADDITIONAL COURSES

Microsoft Front-End [Certificate](#)

2026

- Demonstrates proficiency in HTML, CSS, JavaScript, C#, and responsive web development through Microsoft's professional certification program.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Vice President – IEEE CUST Student Branch

2025-2026

- Led technical workshops, organized IEEE events, and mentored junior members in the CUST IEEE Student Branch.

LANGUAGES
